To Accommodate Increasing Customer Demand and Future Growth, We Have Purchased Our Own Facility and Added Two Additional Okuma Turning Centers

182 White Rock Lane • Billings, MO 65610 • www.creativespecialtiesnow.com

PRESS RELEASE

FOR IMMEDIATE RELEASE:

Creative Specialties is proud to announce their new location at 182 White Rock Lane in Billings Missouri. This facility is over 4500 square feet and has approximately 600 feet of office space situated on 5 acres. Formerly located in Republic Creative Specialties, a CNC Manufacturing company has experienced tremendous demand for production over this past year and literally ran out of room! A large part of the growth is the commitment to providing long lasting high value machining solutions for his customers. Owner John Turano opened the business just a little over two years ago and started out with two CNC machines. In this short amount of time he currently is up to six CNC machines and a new facility that will have the capacity for continued and manageable growth for many years to come.

For more information go to our website at www.creativespecialtiesnow.com or contact John Turano at 417-732-4480 or email jturano@creativespecialtiesnow.com.
